

Family Night @ Lenape Tech

Preparing for Nontraditional Gender Occupations Non-Traditional Careers for Women

Why are there so few women in science, technology, engineering, and mathematics? The answer lies in our perceptions and unconscious beliefs about gender in mathematics and science. Luckily, stereotypes, bias, and other cultural beliefs can change; often the very act of identifying a stereotype or bias begins the process of dismantling it. Research has offered recommendations in three areas to help change the culture: cultivating girls' achievements, interest, and persistence in science and engineering, creating school environments that support women in science and engineering, and counteracting bias. Mrs. Linda Wood, Training Programs Manager from Oberg Industries will be discussing opportunities available for Non-Traditional Careers in the region and here at Lenape Tech!

Builder's Guild Presentation

Mr. Jeff Nobers, Director of the Builders Guild of Western PA will highlight the opportunities available in the 24 trades that the Builders Guild of Western Pennsylvania. There is a significant need for a skilled workforce in many different areas of trades. Mr. Nobers will discuss the opportunities available through the trades, admission and training requirements for acceptance and how students who attend Lenape Tech have the opportunity on getting a head start on a rewarding career.
